

THE OPERATING SYSTEM FOR THE ENTIRE INSTITUTION

Nawah is not another app. It's an education operating system — **embedded inside the tools you already run**, or deployed sovereign and standalone.

FOUR COCKPITS · ONE SYSTEM

INSTITUTIONAL CONTROL 01 No Blind Spots at Board Level At-risk students surfaced before term ends. Faculties ranked by health score. One-click board-ready PDFs. President · Principal	ACADEMIC LEADERSHIP 02 Full Accountability, Zero Spreadsheets Every teacher scored 0–100. Accreditation standards auto-mapped to live evidence in one Locker. Dean · Coordinator	TEACHING 03 More Teaching, Less Administration Quiz generation from 90 minutes to 10. AI co-pilot with attendance, grading & curriculum tools. Teacher · Professor · TA	LEARNING 04 Your Material. Your Language. Zatoona answers from your course materials — not the open internet. Arabic-first, always on. Student · Guardian
--	--	---	---

THREE DEFENSIBLE MOATS

MOAT / 01 Strict Teacher Evaluation Configurable weighted signals roll into a transparent Faculty Health Score and per-professor risk. Every score is one click from its methodology. No black box.	MOAT / 02 Native Accreditation Compliance BSO, ISI, Cambridge, NMU & custom standards auto-mapped to live evidence — pulled at report time, not stale snapshots. Inspection prep: six weeks to one day.	MOAT / 03 Identity-Guarded Sovereign AI Zatoona answers only from the institution's knowledge base and never discloses its underlying model — guarded at both prompt and streaming layers. On-premise option.
